ABOUT NARWHAL FIRE ESCAPE MASK
The Narwhal Fire Escape Mask is a new and innovative product from The Netherlands to allow a person to safely evacuate a building in case of an emergency or to safely enter for rescue operations. The Mask has been tested to protect for a minimum of 30 minutes from fire smoke, and toxic gases.

The Mask is an atmospheric, air-purifying negative pressure, filtration device with a flame resistant hood. The product provides respiratory, head and eye protection to facilitate evacuation from hazardous fire and toxic gas atmospheres.

The Mask can be used for evacuation purposes of oneself or give people the opportunity to find and safe loved ones, like children or elderly/less mobile people. The Narwhal Escape Mask provides individuals with the protection needed to ensure their personal safety at offices, hotels, high rise buildings, homes, schools, factories, mines, airplanes, trains, ships etc. Besides the personal use the Mask can also be used by professionals for rescue activities. eg: Fire Departments, Police Officers and Safety Personnel.

In 90% of all cases, it is the smoke that kills people in a fire, not the flame.
Here is your chance to protect yourself from toxic smoke inhalation!

The mask is CE 1437 / EN 403:2004 certified.
FIRE ESCAPE MASK

PRODUCT FEATURES

• The flame-resistant hood can protect your head from hot burning ash and debris or direct flame up to about 300°C (572°F) during fire escape, especially in high-rise offices and apartment buildings and hotels.

• The Mask has been tested to protect for a minimum of 30 minutes from fire smoke, and toxic gases. The effective period may be longer, depending on the environment, i.e. type and concentration of toxic fumes and dust.

• The Mask protects against Hydrogen Cyanide (HCN), Hydrogen Chloride (HCL), Carbon Monoxide (CO), Propenal (Acrolein) and many other toxic gases and smoke.

Particulate Efficiency: > 95%
Exhalation Resistance: < 300 Pa
Inhalation Resistance: < 800 Pa
Storage Temperature: 0-40°C
Shelf life: 3 years

DIRECTIONS FOR USE

1. No need to be scared, just keep calm, open the packaging and take out the mask.
2. Open the sealbag.
3. Remove the two red rubber caps from the filter located in the front and back of the filter.
4. Pull the Mask over your head from front to back and pull it downwards covering your neck. The filter should be placed over your mouth and nose. Covering your mouth and nose completely. Tighten mask straps to properly fit hood and filter to your head.
5. Breath calmly and follow the route to the nearest emergency exit. If this is not possible, wait for Emergency Rescue Authorities to arrive. Make yourself noticeable by knocking and/or appearing at the window.
